★ **JLPT N2 CERTIFIED** ★ **Cloud & AI / ML Engineering**

Computer Vision | Edge Deployment (Raspberry Pi) | AI / Agentic | MLOps | IoT & Embedded Systems

PROFESSIONAL SUMMARY

Computer Engineering student at UTeM specialising in AI/ML, Computer Vision, and Edge Computing. Currently pursuing AWS cloud certifications to bridge production ML systems with cloud infrastructure. Proven track record deploying and testing production-oriented computer vision systems — from edge inference to cloud-hosted model serving with CI-verified reliability and JLPT N2 certified.

KEY PROJECTS

Deep Learning Oil Palm Ripeness Classifier [Final Year Project]

- Trained and benchmarked 5 CNN architectures (MobileNetV2, MobileNetV3, EfficientNetB0, ShuffleNetV2, ResNet18) for on-device ripeness classification
- Deployed end-to-end real-time edge inference on Raspberry Pi 4B + Camera Module 3, eliminating cloud dependency.

PPE Compliance Detection System [Deployed · Hugging Face Spaces]

- Quantized YOLOv8n to INT8 ONNX for a 14-class PPE compliance detection system (mAP@50: 0.776), with dual-backend inference (local ONNX + Roboflow serverless fallback) for deployment resilience.

Agentic RAG Exploration [Personal Learning]

- Self-directed exploration of agentic workflows built RAG pipelines using OpenAI Agents SDK and Ollama, local models and n8n multi-agent.

EDUCATION

B.Eng Computer Engineering (Honours)

Universiti Teknikal Malaysia Melaka (UTeM) · FTKEK

Mar 2023 – Jul 2026

Current CGPA*

3.86

/ 4.00

Diploma in Electronics Engineering

Universiti Teknikal Malaysia Melaka (UTeM) · FTKEK

Aug 2020 – Feb 2023 · CGPA: 3.9

INTERNSHIP

Engineer Intern – JoonHee Micron Sdn. Bhd.

July 2025 – Sept 2025

- Kept the **Automation Production Line** running at peak uptime by diagnosing and fixing equipment issues.
- Picked up hands-on knowledge of **PLC systems and automation design**.

Assistant Engineer Intern – TNB Jalan Meru Klang

Oct 2022 – Feb 2023

- Rotated through 8 units over 16 weeks, gaining **end-to-end exposure** to how power gets from planning to customer.
- Supervised contractor projects on-site**, learning what it takes to keep work quality and safety standards on track.

TECHNICAL SKILLS

Python / C / C++ / Java / HTML
MATLAB
TensorFlow & OpenCV
Arduino / IoT
Git / GitHub
SQL / Cloud

CERTIFICATIONS

Cisco Networking Academy —
Cyber Threat Management (Nov 2024)
Cisco Networking Academy —
Endpoint Security (Dec 2024)
Coursera —
Introduction to Data Science & SQL

AI & AGENTIC STACK

CNNs (MobileNetV2 etc.) · TF Lite
OpenAI Agents SDK · RAG Pipelines
Ollama · LM Studio · PyTest / CI CD
n8n · Multi-agent Orchestration

HARDWARE & TOOLS

Raspberry Pi 3/4B/5 · ESP32
Circuit Design · VLSI Design
FreeCAD · Fusion 360

ACHIEVEMENTS

- INOTEK Silver Award**
IoT Hydroponic Monitoring System —
UTeM Innovation Exhibition
- Published Researcher**
IET Digital Library

LANGUAGES

Japanese **JLPT N2 Certified**

Mandarin Native
English Proficient
Bahasa Malaysia Proficient
